PROFESSIONAL EXPERIENCE

Data & Business Analyst - *Savani Constructions, Surat, India*

March 2025 - Present

- Architected a predictive cost-intelligence system (Random Forest, Gradient Boosting) governing a Rs. 165 Crore portfolio, reduced budget variance by 7% and reclaimed Rs. 1.35 Crore annually in capital overruns.
- Engineered an automated SKU-standardization engine utilizing fuzzy matching to reconcile 35+ disparate supplier databases, eliminating Rs.70 lakhs in redundant inventory spend.
- Deployed predictive supply chain models to calibrate safety stock against seasonal volatility securing 85% on-time material availability to prevent critical project delays.
- Translated complex ML outputs into strategic frameworks for 18 executive stakeholders, embedding predictive insights into daily operations to accelerate decision cycles by 4 days.

Data & AI Specialist - *Sigma AI, London, UK*

January 2023 - January 2025

- Directed quality calibration for enterprise Speech-to-Text models across 5 cross-functional teams, drove 8% increase in dataset throughput across 80 multimedia categories with near zero quality degradation.
- Spearheaded downstream model optimization by engineering rigorous self-QA protocols for high-variance phonetics, improving model accuracy by 12% and reduced Word Error Rate (WER) by 14%.
- Co-developed a core failure-mode library mapping 100+ edge cases while mitigating model hallucinations and established a new foundational quality standard.
- Scaled annotation workflows while institutionalizing robust data privacy safeguards, maintaining strict GDPR compliance with zero breaches over a two-year tenure.

ML Engineer - *Arbuda Infrastructure Projects, Mumbai, India*

August 2020 - August 2021

- Deployed a geospatial flood-risk dashboard (Azure Maps, Power BI) processing 2M+ data points to enable real-time vulnerability monitoring for municipal stakeholders.
- Optimized data engineering architecture through rigorous code reviews, reduced ETL pipeline execution time by 5% and significantly accelerated deployment velocity.

EDUCATION

MSc Big Data Science (Distinction) *Queen Mary University of London, UK*

September 2021 - January 2023

Dissertation: Blockchain Anomaly Detection using Cloud-Native ML Ensembles models with 95% accuracy on 2.9M+ transactions.

B.E. Information Technology (7.81/10) *University of Mumbai, India*

August 2021

Thesis: Emotional Intelligence in Professional Growth using Logistic Regression & PCA (89% predictive accuracy).

TECHNICAL SKILLS

- **Languages & Data:** Python (Pandas, NumPy, Scikit-learn), SQL/T-SQL, MongoDB, Bash, Go
- **ML & AI:** TensorFlow, PyTorch, XGBoost, Hugging Face, LLMs (LangChain), Agentic AI, CNNs, Bayesian Optimization, SARIMA, NLP/NLU, Prompt Engineering
- **Cloud & MLOps:** Azure (Databricks, Synapse, AML), AWS (SageMaker), Docker, Kubernetes, Airflow, MLflow, CI/CD, Google Cloud, CI/CD Automation, Apache Spark, Git
- **Data Engineering:** Python (Pandas, NumPy), SQL/T-SQL, MongoDB, ELT/ETL Pipelines, Data Governance
- **Visualization:** Power BI, Microsoft Fabric, Tableau

RECENT PROJECTS

Strategic Pricing & Margin Optimization

- Engineered a Multi-Factor Composite Pricing Engine in Python synthesizing real-time market signals.
- Corrected negative margins (-17.7% to +4.5%) via intelligent segmentation, projecting a 20 - 25% portfolio margin lift.

Econometric Price Dynamics Analysis

- Developed a SARIMA time-series model with 95% confidence intervals to predict commodity fluctuations.
- Conducted seasonal decomposition analysis to directly inform executive inventory risk management and procurement timing.

COURSERA CERTIFICATIONS

- Deep Learning Specialization - DeepLearning.AI
- Google IT Automation with Python - Google
- End-to-End ML with TensorFlow on GCP
- Image Classification with CNNs using Keras
